

FOOD CONTACT MATERIAL CONFORMITY CERTIFICATE

Subject: Wide mouth bottle, aseptic and single film wrapped (TRAP)

Material: High density polyethylene (HDPE)

Labbox labware declare, under the manufacture responsibility, that the product indicated in the subject:

- Comply with the requirements established in the European Directive 994/62 CE and in law 11/97 of 24 April 1997 of packaging and packaging waste, in relation to the sum of the levels of concentration of lead, cadmium and chromium hexavalent.
- They are suitable to be in contact with foodstuffs, complying with the Spanish legislation and the Community directives included 10/2011.
- Comply with Directives 90/219/EC and 90/220/EC relating to genetically modified microorganisms.
- Comply with the requirements for the traceability of Regulation No. 1935/2004.
- They do not contain chemical substances and preparations and are, therefore, exempt from registration, evaluation and authorization established in Regulation EC 1907/2006, REACH. Substances included in the list of highly troubling substances are not used in commercially available packaging.
- EC Regulation 1223/2009 of the European Parliament and of the Council of 30 November 2009 on cosmetic products.
- In normal and foreseeable conditions of use, the packaging does not transfer its components to the food with which they may be in contact, in quantities which may pose a danger to human health or cause an unacceptable modification of the same.
- And we certify that it produces its food packaging in accordance with Commission Regulation (EC) 2023/2006 of 22 December 2006 on good practices in the manufacture of materials and objects intended to come into contact with foodstuffs, as amended by Regulation (EC) 282/2008 of 27 March 2008.
- The materials used for the manufacture of these, comply with the requirements of Regulation (EC) No 1395/2004 and have been produced using additives and monomers authorized in annex I to Regulation (EU) No. 10/2011.
- The global Migration trials performed for 95% ethanol meet the default limits. These have been carried out at a temperature of 40 ° C for a period of 10 days. Specific migration limits, according to the specifications of the raw material supplier, are within the authorized limits.
- It does not contain heavy metals or any intentionally added, according to current legislation.
